

GUIDELINES FOR CONTRIBUTORS
Topics in Photographic Preservation, Volume Twelve

1. So that each article is accurately represented when used outside of its original context, the following information is **required**:
 - **Article Title**
 - **Author**
 - **Presentation History** (i.e., “Paper presented at Year, Meeting, Location”)
 - **Full Volume Citation in Footer** (Topics in Photographic Preservation, Volume Twelve 2007)
 - **Continuous Pagination in Arabic Numerals in Footer** (The Compiler will replace article page numbers with the book page numbers.)
 - **Statement at end of article that reads, “Papers presented in *Topics in Photographic Preservation, Volume Twelve* have not undergone a formal process of peer review.”**
2. Copy must be in 8-1/2” x 11” format with all margins set at one inch. Times New Roman is the required font so that any necessary reformatting will be kept to a minimum. Contributors are encouraged to use the article template, available from the Compiler.
3. For reasons of economy, authors are encouraged to submit single spaced copy and keep papers as brief as possible.
4. If at all possible, authors are requested to use the reference style adopted by the *Journal of the American Institute for Conservation* (URL <http://aic.stanford.edu/pubs/styles.html>). Use of footnotes and endnotes is not recommended.
5. To facilitate the compilation of articles and delivery to the printing company, please submit articles to the Compiler as *Word* documents via email attachments, not as camera-ready hard-copies. If submission as a *Word* document is not possible, contact the Compiler for further information.
6. Digital images placed within the text of the document are acceptable. However, contributors must ensure that the images are of sufficient quality for reproduction. For example, when printed on a standard laser printer, there should be adequate highlight and shadow detail so that no visual information is lost. *Contributors are encouraged to use the smallest practical file size that will give the appropriate quality for the dimensions used in the publication. Do not take images directly from a PowerPoint presentation because the quality will not be adequate for printing.* If submissions of illustrations are not possible in digital format, please contact the Compiler for further information. Ensuring that images are properly credited is solely the responsibility of the authors.
7. All text and illustrations printed in *Topics in Photographic Preservation* are in black and white only.
